

Impulse Sealer How To Guide

Step
1

Insert power cord into wall outlet. It is usually best to set the timing dial to 2-1/2. This can vary depending on the thickness of the plastic film that is being used.

Step
2

Place item(s) in the bag. Put unsealed end of bag on the sealing pad.

Step
3

With bag in position, lower the sealing arm with light pressure to the pad. Hold down until the red light goes out. Continue pressure 2-4 seconds to "set" the seal.

DONE

Sealed bag ready for shipment or disposal.
